iOS Developer with 5+ years building production apps in Swift, Objective-C and Flutter. Shipped everything from enterprise super-apps to fintech, food delivery and crypto exchange — obsessed with smooth UI, clean architecture and real performance.

EDUCATION

Bachelor of Information Technology Hanoi university of business and technology	Aug 2017 - Dec 2021
Attending IOS Swift programming training TECHMASTER Vietnam	Mar 2021 - May 2021

SKILLS

Programming Languages: Swift, Dart.
UI: Auto layout, multi layout, custom view
Design pattern: MVC/MVP/MVVM/Viper
Databases: UserDefaults, Realm, KeyChain
Server: Web Socket, Restful Api
Library: Firebase, SnapKit, Chart, RxSwift, AppAuth, Lotie, DataDog, Braze, SdWebImage, LiveKit, KakaoSDK, NaverSDK, Bloc, Dio, GetX...
Configuration Management tools: Git, Bitbucket, AWS, Tuist, XcodeGen, SwiftGen, Fastlane, Jenkins, CI/CD
Programming Tools: Xcode, Visual studio code, IntelliJ IDEA
Agile Tool: Jira, Backlog, Monday

PROJECTS

VNASA VNASA is an internal mobile super-app developed exclusively for Vietnam Airlines employees. The application brings multiple corporate workflows together into a single platform, helping staff across the organization manage daily work, performance, and innovation activities on the go. The app centralizes key internal modules including Innovation Management (Skyldea), KPI & Performance Review, Newsfeed, Notifications, and integrated services through a unified Super App home screen. With VNASA, employees can submit creative ideas, initiatives and solutions, follow innovation campaigns, consult experts, track personal KPIs, complete performance reviews, receive corporate news and push notifications — all in one secure, role-based environment tailored for Vietnam Airlines' internal use.	Aug 2025 - Present
PHOTOISM  Photoism is a mobile app designed to enhance the Photoism photobooth experience by allowing users to manage coupons and access exclusive photo frames and filters for use at Photoism photobooth machines. With the app, users can easily receive and manage coupons, browse available photo frames, and select special filters to personalize photobooth sessions. These digital items can be used when taking photos at supported Photoism photobooth locations, making each photo session more fun, unique, and memorable. Photoism helps users enjoy a smoother and more personalized photobooth experience by bringing coupons, frames, and filters together in one convenient app.	Mar 2025 - Aug 2025
SNAPISM  To develop an iOS mobile application that enables users to easily create, customize, and print photos directly from devices using integrated photobooth machines located in stores or event spaces. The app offers a fun, fast, and seamless photo creation and printing experience.	Dec 2024 - Aug 2025
GIIS (Smart Learn App)  Smartlearn is a cutting-edge application powered by artificial intelligence, seamlessly integrating a comprehensive learning management system (LMS) with a robust student information system (SIS). It provides an advanced platform for educational institutions to efficiently manage and deliver personalised learning experiences, track student progress, and streamline administrative tasks.	Mar 2024 - Mar 2025
GIM (VYIN SDK) <u>Project Overview:</u> This project focuses on creating an SDK for iOS that supports seamless video and audio calls, along with real-time communication using sockets, specifically designed for meeting applications. The SDK leverages LiveKit for efficient and scalable video and audio streaming, ensuring high-quality real-time interactions. Additionally, it integrates ChatSdk to provide robust text and multimedia chat functionalities. The use of sockets allows for low-latency communication, making the SDK suitable for applications where real-time collaboration is essential. <u>Key Features:</u> - Video and Audio Calls: Powered by LiveKit, enabling real-time video and audio streaming with high scalability and reliability. - Real-time Messaging: Integrated with ChatSdk for sending messages, images, and other media during or outside calls. - Socket Communication: Ensures low-latency interaction, allowing smooth transitions between different states of the meeting (e.g., joining, leaving, or switching between video/audio). - Meet Application Support: Tailored for meeting applications with features such as user management, call recording, and screen sharing.	Sep 2024 - Feb 2025
Yogiyo App  - Yogiyo enables users to order food from restaurants using its online platform and mobile app. Allows users to search restaurants based on the location and the food type, browse menus, place orders and make payments. Partnered restaurants are responsible for the delivery of the	Dec 2022 - Sep 2024

food orders to the customers. The app is available for iOS and Android. Operational for the restaurants in Korea. Acquired by Delivery Hero in Dec'14.

Toyota Wallet 

Jun 2021 - Aug 2022

- myTOYOTA Wallet is a mobile payment solution that brings together a range of payment options in a single app. It allows you to pay electronically using e-money, credit or debit cards.

WORK EXPERIENCE

Mobile Developer (iOS / Flutter)
SOTATEK., JSC

Aug 2022 - Present
Hanoi, Viet Nam

- Build and lead mobile for large outsourcing products — from enterprise super-apps to fintech, food delivery, photobooth and edtech.
- Implemented Universal Links, enhancing user experience by seamlessly redirecting users to the app from the website.
- Implemented TestFlight for beta testing, streamlining the feedback process, and reducing bug turnaround time by 50%.
- Ensured full compliance with Apple's App Store Review Guidelines, leading to quick app approvals and avoiding any rejection or delays.

iOS Developer
OPN VN

Jun 2021 - Jul 2022
Hanoi, Viet Nam

- Built fintech products for the Japanese market.
- Updated apps regularly to adopt the latest iOS versions and new Apple technologies, resulting in positive reviews and high user ratings on the App Store.
- Implemented efficient memory management techniques, reducing app crashes by 25% and improving overall stability.
- Ensured full compliance with Apple's App Store Review Guidelines, leading to quick app approvals and avoiding any rejection or delays.
- Resolved complex technical issues promptly, maintaining an average bug resolution time of under 24 hours.
